

The Mark of the Beast?

By Vic Shannon

The first thing I would like to talk about is the Universal Product Code. We see them everyday of our lives. But, just like about anything, we don't notice them because they are so common. We first started using them about 1972. They first started to show up on a few items such as tobacco and cigarettes. Now today they are on almost everything.

UPC Bar Codes

The Most Commonly Used.

Design #1

Design #2

If you will notice design #1 and design #2 you will see the two most commonly used codes. Design #1 is most commonly used on food items. And design #2 is used on allot of magazines and tobacco items. Also you will notice that design #2 is half the size of design #1. Also you will notice that design #1 is evenly divided. Let's first discuss design #1 and how it works then we'll come back to design #2 and see the differences.

Design #1

As I stated before, design #1 is divided into equal sections by two narrow lines. The left side is the manufacturers code and the right side is the product code. Anything by the same manufacturer will have the same numerical code on the left side. Each manufacturer number has its own standard code for identification. The right side for the product code will vary between one product to the next within the same manufacture. Example: Campbell's has a manufacturers code of 51000. Campbell's Special Request Bean with Bacon 11 1/2 oz. can, has a code of 51000-06207 and the Special Request Cream of Mushroom 10 3/4 oz. can, has a code of 51000-06007. The price of the item and anything else needed to be known about the product, is programmed into the store computer. So at the time you purchase the product, it is scanned and then automatically deducted from the inventory.

Computers work through an electronic switching system and we understand the switching system as binary code. Binary code is 1's and 0's, the 1's represent an on state in the computer and the 0 represent an off state. A single digit, either a 1 or 0, is a Bit. A sequence of 8 bits makes a Byte. With 8 bits to a byte, there are 256 combinations of 1's and 0's or 256 bytes that can be made. Each byte represents a Character or control Characters, which the computer can use for controlling the Central Processing Unit (CPU) or producing numbers and characters on the screen, printer or some other output device. A Program is a combination of thousands of these bytes controlling the computers CPU to perform a particular task, such as word processing, number crunching, games, Aircraft control, and etc. There are different types of output devices used in a computer system, printers, monitors, etc. Magnetic media (Magnetic disks, Magnetic tape) is also another form of output that is used as a storage device which stores the bits in a magnetic format. Then there is also CD's for storage. These same storage devices can be used to retrieve information for processing by the CPU. Input devices are keyboards, keypads, lightpens, laser scanners, etc. The most common one used in stores are keypads and laser scanners. And the output device used mostly is monitors, storage devices, and the cash register printer that prints out your receipt.

Laser

A laser is an instrument used to form a beam of optical radiation (Light) at a specified wavelength. The atoms of the gas inside the laser tube (such as hydrogen, deuterium, carbon dioxide, or fluorine depending on the type of laser) is excited by the laser lamp to a high energy level as they absorb their character wavelength from the white light. As the atoms de-excite, they emit their characteristic wavelength, and that wavelength only. This can occur either spontaneously or by encountering the emission of another atom. The reflective inner walls of the laser tube reflect these light waves back into the tube and toward other atoms, causing them to emit light also.

Some of the light waves are allowed to leave the tube, in this case through a semitransparent portion of the mirror and an opening in the tube wall. These waves emerge as a coherent beam of light, a laser beam. The beam is aligned as a result of reflections back and forth between the reflecting mirror at the left and the semitransparent mirror on the right. A Maser is the same thing as a laser but instead of optical wave forms being transmitted, a maser transmits microwave wave forms.

Design #1 uses List #1 for the Manufacturers code and List 2 for Product code.

Design #1

The Design #1 UPC Bar Code, as I mentioned earlier, is divided in two sections. Left side is the manufacturers code and the right side is the product code. Set #1 is the line configurations used for the manufacturers code and Set #2, is used for the product code. As the laser from the scanner scans across the code mark, the computer can tell the difference between the two sides by the difference in the code sets. So it doesn't matter which direction the code is scanned, and the proper order of the code is maintained. Each numbered code in both sets, has two lines to make up the code number, and each number has its own distinct two line configuration. This way, the computer by the (eye) scanner sees each individual number. When we buy items at the store (most supermarkets today) we take them to the check out counter and the checker runs the items across the scanner window where a beam of laser light flashes across the UPC bar code. As this happens the computer converts the code into binary (1's and 0's) code and then processes the information in the CPU of the computer. Then the price of the item is display at the checkout counter (almost instantly) and when we pay for the items that we have bought, we get a receipt with the products that we bought listed and the price of each individual product.

Left	Right	Left	Right	The Binary Codes Configurations
 0001101	 1110010	 0101111	 1010000	
 0011001	 1100110	 0111011	 1000100	
 0010011	 1101100	 0110111	 1001000	
 0111101	 1000010	 0001011	 1110100	
 0100011	 1011100			
 0110001	 1001110			

What happens is, the laser light is reflected off the bar code and inside the scanner window is a receiver that picks up the reflections. Where the code has a line the reflection is different then where the code does not have a line, so the receiver reads it a little differently.

As you can see here, each line number has seven segments. Each segment is then either a 1 (on) or 0 (off). As the laser scanner scans across the UPC bar code it then sees a series of 1's and 0's and converts them into the specified numbers and then into the specified code for the manufacturer and product codes. (You can associate the codes here with the binary configurations and see the similarity.)

In March 1982, the banking industry required that all bank cards (including credit and debit cards) to have been converted to cards with magnetic strips on the back. This magnetic strip holds 100,000 words of information and is read by a reader head (much like the head on a music tape deck) which feeds digital (binary code) information into the computer.

The Wall Street Journal (Nov. 5, 1985) stated: A new banking era has begun. and Citibank invites you to be in the forefront -- A Global System' linking every major city in America to a bank with a financial service network that circles the entire world [S.W.I.F.T.](#) is this global system.

[S.W.I.F.T.](#), The [Society for Worldwide Interbank Financial Transactions](#), is a vast banking network with no vault, no cash. It is a system for large transfers. Value exchanges will be ordered by these bank computers, and numbers will be juggled when any transactions are consummated. Universal Electronic Banking. The [S.W.I.F.T.](#) organization is a culmination of a range of studies initiated in 1969 with the aim of providingan improved an improved international payments system...

In May 1973, some 240 of the largest European and North American banks set up the [S.W.I.F.T.](#) organization with the aim to design, implement and operate an International Financial Network that enables member banks to be able to transmit between themselves international payments, statements and other messages associated with International Banking.

Carl Reuterskiold, [S.W.I.F.T.](#) General Manager. on Oct. 19, 1977 Stated: [S.W.I.F.T.](#) is a co-operative society created under Belgium law and registered in Brussels. It is wholly owned by the member banks, the shares being distributed at present according to anticipated traffic transmitted via the network... there is a team based in Brussels who prepare instructional material and visits countries to assist National User Groups with educational courses, seminars and workshops. Each [S.W.I.F.T.](#) country has it's own internal organization which differs according to national requirements. Most nations have national members who meet regularly to review current progress. Each country has at least on user group representative who is nominated by the users and is usually an employee of a member bank or national banking association. He is the focal point for [S.W.I.F.T.](#) liaisons. ([S.W.I.F.T.](#), F20, 160 second edition, Jan. 1977)

So what [S.W.I.F.T.](#) is, is a one world international banking system that can make sure your bill, of the items you buy in Spain, will be waiting for you when you get home, with all items listed and itemized. Also, transactions made by large corporations from the U.S. and other countries. And it's all completely done by digital electronics (1's & 0's).

The Network, in it's first phase, covers most of western Europe and North America. It's a two-center financial transaction control system. The banks connection their terminals to programmable concentrators in each country... Although each operating center features fully duplicated computer configurations, a two-centered design is used for increased security, should one center become unavailable through natural catastrophe or industrial sabotage, each configuration has enough capacity to handle the entire traffic load. ([S.W.I.F.T.](#), F20 160, Jan. 1977.)

In Future Developments of [S.W.I.F.T.](#) (1977), Burroughs Corporation wrote: The [S.W.I.F.T.](#) network cutover has now taken place. Live messages are being transmitted and, with [S.W.I.F.T.](#), Burroughs is looking forward to the time when all current member banks will be connected to the system, and beyond that, to the enclosure of other banks and other countries, until the system becomes WORLD-WIDE.

There are currently two switching centers in Europe, one in Brussels and one in Amsterdam. It was once thought the Brussels center could handle projected traffic through 1985. Currently though, the [S.W.I.F.T.](#) organization is building another switching center in Culpepper, Virginia, to help carry the load.

Dr. T. Hugh Moreton says in '[S.W.I.F.T.](#) Banking and Business`': In Early 1982 we are ready to believe every country in the world will be connected in one way or another to [S.W.I.F.T.](#) Now it's 1997, It's my opinion that it is safe to assume that [S.W.I.F.T.](#) has probably reach that point. It would also take a few mass storage devices such as the IBM 3850, which can hold 472 billion characters of information, and probably a Cray II CPU unit.

In OMNI magazine 1983 in an article by Phoebe Hoban, Artificial intelligence-Laser Cards: The floppy disk of the future may not be a disk at all, but a snippet of plastic resembling a credit card. And this inconspicuous memory device, small enough to fit into your wallet, will be able to store an entire book of data about you. According to it's maker, [Drexler Technology Corp](#) in Mountain View, Ca., the Drexon laser card will be widely used as portable software for personal computers and video games. It will make available a new kind of identification from electronic passports to miniature medical files that could hold hospital records and even x-ray images. Your driver's licence, registration, insurance, and an entire automobile maintenance history could be carried in your pocket...the small cards are likely to offer extraordinary storage space. Right now the cards,

which sell in quantity for about \$1.50 each, can store 2 megabytes of information—the equivalent of about 800 pages of text. Within two or three years from now these remarkable products will be packing 7 megabytes, and ten years from now, Drexler claims these remarkable products will hold 25 megabytes per side. Just think, you could walk around with approximately 20,000 pages of information on everything about you in a handy little card in your pocket.

In the Denver Post, June 21, 1981, an article by Gail Pitts Stated: It's finally happening: this all purpose identification computer chip for animal, people, heavy equipment, and the daily TV set...a chip...about the size of the lead in an automatic pencil—which can be injected with a simple insulin-type syringe into human or horse...the needle is capped and ready to forever identify something or somebody...it can be affixed to inanimate objects with epoxy--hidden inside the TV set...or under the felt of the base of an antique silver candlestick holder...contained in the package is an induction coil and a capacitor to create a weak electrical signal when a scanner activates it...one wafer is encoded with a 12-digit unique number. With 12 digits, the system can produce some 4 billion unique numbers...system ID's injected is the outgrowth of electronic identification research conducted over the past 10 years by the federal government at Los Alamo.

How does this microchip identification technology work? Here is a basic illustration. Suppose you have a pet. Info-Pet and other similar animal ID companies are marketing pet identification systems. Each chip, about the size of a grain of rice, has a unique number that can be read with a hand-held scanner. A hypodermic needle is used to insert the microchip painlessly into the animal. Information is stored in the chip such as the identity of the owner, address, veterinarian and the pet's medical records. For approximately \$25 TO \$35 you can have your animal implanted. So, if your cat is lost in Albany, NY and turns up in Kansas City, Missouri without an ID tag but has been implanted, a scanner can read the invisible chip and all the information comes up for review. As a result, your pet will be properly identified and returned to you. A great system? Yes, in a lot of ways, especially if you love pets! However, there are many who suggest people should be next. The two groups being targeted are prisoners and children. Overcrowded jails have caused some people to suggest microchip transponder ID s for them, because by using a remote

scanning device it is possible to know their exact location at all times. Any attempts to escape or hide will be futile. Any prisoner could be located instantly. With children, what better way to stop kidnapping?

We need to understand that the microchip's main purpose is simple: IDENTIFICATION AND INFORMATION. Incidentally, some people still think the UPC bar code will ultimately be used to operate the world wide information system, leading to the mark of the beast. But the UPC bar code system is very limited. It does not have the capacity to update data on the individual. I do want to make clear here that the UPC code is just a "link" for identifying products and items in a computer data bank system. However, the microchip because it has an eeprom embedded in it, can have its data updated effortlessly.

Are biochip/microchips in their various forms really the wave of the future? In May 1996 the Chicago Tribune featured a headline "In Future Tiny Chip May Get Under Your Skin." The following article gave all the beneficial reasons for microchip implants. You would never have to worry about lost or stolen credit cards, you would also have safety, protection, security, etc . Think it will never happen in humans?

Consider this, from this same Chicago Tribune article. Edward Cornish, President of the World Future Society, which is a globalist new age group, stated, "The locator ID chip may be inevitable." He also made this chillingly candid statement about the microchip's use: "Things that are voluntary today, have a way of becoming compulsory tomorrow."

Could the microchip implant lead to the future mark of the beast, spoken of in the Bible?

According to Strong's Concordance, the Greek word charagma means "a scratch or etching, stamp a badge of servitude, graven mark." Derivatives of the word are: "charakter"- a graver, the figure stamped, *i.e.* an exact copy or representation, express image; "charax"- to sharpen to a point through the idea of scratching. Evangelist Dr. Carl Sanders, an engineer who previously helped develop the microchip, shared the following information in his book, *Are You Ready For the New World Order?*

"The pattern for the microchip transponder data when read under a scanner, will be as follows:

1. Name and picture
2. Social security number
3. Fingerprint data
4. Physical description
5. Address
6. Family history
7. Occupation and income
8. Tax information
9. Criminal record

Only naivety would cause one to believe that privacy of any kind really exists today."

In Revelation 13 we see three components of the future new world order working in tandem under this future 666 Antichrist and his world system. Jeff Baker, political analyst, researcher, and journalist, in his excellent classic book, *Cheque Mate*, (p. 203) comments on the meaning and significance of 666.

"I believe that the 666 is actually a combination of three sets of sixes. The first 6 represents man's political system, The second 6 represents the economic system of man, and the third represents the religious system of man." A very astute observation, and that is exactly the three headed

structure we find in Rev. 13. The 666 referred to in verse 18 is very significant, because in ancient times a person's name had a fixed numerical value. The reason for that: the letters of the alphabet were used for numbers. In scripture, 6 is the number representing man. The number 6 is also considered sacred by many new age and secret society groups, A triad, or 3, is God's number. So, the triple 6 (666) is the symbol of man making himself God. See Daniel 11:36 and 2 Thess. 2:4. The number 666 is also the Greek word chi xi stigma. (Rev. 13:18) Strong's Concordance: "The 22nd, 14th, and an obsolete letter of the Greek alphabet, used as numbers; denoting respectively 600, 60, and 6; 666 as a numeral-six hundred threescore and six."

Now, the word "stigma" --"from a prim. stizw stizo (to stick; i.e. to prick- a mark incised or punched) for recognition of ownership i.e. (fig.) scar of service- mark."

By now, it should be clear that presently the technology of the microchip is not the mark of the beast. However, it is also plain to see, though the technology is still continuing to be fine tuned, some of its benevolent uses. Someday, in the wrong hands, it will become a malignant curse. Dr. Carl Sanders, in a recent conversation at Boston Medical Center, posed the following question to a physician: "What if the concentration of lithium in the microchip breaks down, or what if there is a blowstruck (term for a microchip malfunction.)? The doctor, an atheist, replied, "it will cause a grievous sore." Incredible, because Rev. 16:2 states, "and there fell a noisome and grievous sore upon the men which had the mark of the beast, and upon them which worshipped his image."

Let's look at how sophisticated this system is getting. A company know as [Digital Angel Corporation](#) states from their website, "Digital Angel Corporation develops advanced [RFID](#) and GPS technologies that enable rapid and accurate identification, location tracking, and condition monitoring of high-value assets. Applications for our products include identification and monitoring of pets, humans, fish and livestock through our patented implantable microchips as well as message monitoring of aircraft in remote locations through integrated GPS and geosynchronous satellite communications systems." Implantable Chips in Humans..? With the use of GPS (Global positioning Satellites) Digital Angel can track the wearer of this implanted chip anyplace in the world.

Also, [Applied Digital](#) is another company developing implantable tracking chips and software..

As quoted from OMNI magazine Feb. 1985 from an article on Fiber-optics: It's growing! Like a living, sentient creature, it's tendrils hide in our walls, snake out to the streets, run from pole to pole, tunnel beneath the pavement, and arc across space on microwaves. Like an extraterrestrial invader with superhuman powers, it has become so ubiquitous that we barely notice it's presence among us. Yet it's instruments have penetrated virtually every home in the United States and every office of business and government of the world.

Most humans have no idea of how complicated the creature is. We see little more than an instrument that sits on a desk or hangs on a wall. But that is merely a nerve ending of the creatures entire body. Beyond that visible, palpable instrument is the creatures nervous system, humming with electrical signals, flickering with laser light.

The 'creature` is of course, the telephone system, and it's heart-no it's brain-resides in a complex of modernistic building spread over a 25-mile area in New Jersey: The AT&T Bell Laboratory...

Most of us don't realize the complexity of the telephone system but, today, the technology is at a point of being completely digital and computer controlled to where the system can virtually operate humanless. We just maintain the humans for operators, management, maintenance, and growth and technological advancement of the system.

Fiber Optics Technology - the branch of physics concerned with the propagation of light that enters a thread or rod of transparent material at one end and is totally reflected back inward from the wall, thereby being transmitted within the thread from one end to the other. Pulses of light (binary code) can be used to transmit voice and data from one location to another. From the same article in OMNI Solomon J. Buchsbaum, executive vice-president of AT&T Bell Labs, said, The key question is, what kind of integration, or synergy, can be produced among these various forms of communications services? It is evolving, in Buchsbaum's words, into one giant interconnected computer. Just think of it, by use of the AT&T system the world has become a One-World computer data base-system.

In the Late 1960's there was much discussion about The Cashless Society where paper money would no longer be needed and all goods and services would be bought through the use of a universal cash card. On payday, the amount of an individual's paycheck would be deposited electronically from the company's account to the employee's account (direct deposit). To purchase groceries, gasoline, or any other products or services, the Universal cash card would be used to transfer from the purchaser's account to the vender's account. At the end of the month, a complete record of each individual's expenditures would be available; there would be a tremendous reduction in paperwork, and bad checks would be eliminated. Today, under the term Electronic funds transfer (EFT) this concept is being implemented in what may become one of the largest communication networks in existence. The question posed with EFT is similar to the problem with national data banks - who is to have access to this financial information and what protection do citizens have in ensuring the right to privacy? Some authorities feel that EFT offers one of the biggest threats to the freedom that currently exists in society. For when carried to it's fullest extent, EFT would provide government agencies with complete records of every facet of each person's life. Little could be done, from eating to travelling, without records being recorded in some computer system. Some feel that a system like this could lead to complete governmental control over society! (Could George Orwell been right in his book 1984?)

With the increased use of 24 hour teller cards as debit cards, this concept of record keeping is happening right before our very eyes today. You can go to Wendy's, Ralphps, Lucky, AM/PM Mini-mart's and a number of other merchants without cash and use your teller card as a debit card and deduct the amount from your account through EFT. Think of this...They know who you are, where you are, when you were there, and what you bought just from using your Debit card at the point of sell. And, when you get cash from the teller machines, they ("They" being who ever wants to know in the government agencies) also snap your picture with the camera at the unit itself.

**24 hour
teller
machine.**

In U.S. News and World Report Dec. 15, 1983, an article titled "Time to Throw Away Your Checkbooks..?" This article brought forth information about the increased use of EFT. It stated "Not quite yet but sooner than people think, a single card could replace most cash and checks. Welcome to the cashless society - today, New Yorkers who keep their money in the Chase Manhattan Bank can withdraw cash from any of 2000 automatic teller machines, or ATM's located in 47 states. So can 15 million depositors at some 1200 financial institutions that belong to the national network called PLUS... Scores of other banks and merchants are at the forefront of an almost frantic drive to replace paper money with the electronic kind.

Bank of America offers it's customers with the same options, and Home-Banking which is the use of a customer's home computer through a modem to the bank computer system, to pay bills and transfer funds from the comfort of their own home.

These are a variety of Smart cards.... Notice the silicon chip mounted in the card.

I want to take a brief moment here to put in a side note... In the April 27, 1998 issue of TIME Magazine with a cover title of "The Future of Money" an article titled "The Big Bank Theory and the Future of Money" it stated... "Paper Money is, in its way, amazing stuff. It is, for instance, easily transferable and widely accepted. You can pay the baby sitter without even thinking about the complex financial dynamics underlying the transaction. Cash-especially the U.S. dollars-is also portable, storable and exchangeable. (Just ask the thousands of Russian Mafiosi who pay for nearly everything with crisp \$100 bills) And it holds up pretty well, If you're afraid of banks, you can still grab a coffee can, dig a hole in the backyard and have a pretty secure deposit. But paper cash does have some awful drawbacks. Lose it and it's gone; sit on it and it may lose its value overnight: think about what just happened in Asia, or earlier in South America.

"Enter electronic cash. The idea of digital money is simple enough: instead of storing value on paper, find a way to wrap it in a string of digits that's more portable and (most important) smarter than it's paper counterpart. Smart money? Well yes. Because digital cash is endlessly mutable, you can control it more precisely than paper money. Think about the \$2000 check you send to your daughter at college for expenses. How is the money really spent? Books...or beer? Electronic cash takes that relatively simple transaction-passing an allowance-and makes it into a much more intelligent process. And one that hardly requires something as old-fashioned as a bank.

"For starters, you can send the money over the Internet encoded in an E-mail instead of sending a check. This saves you the trouble of balancing the checkbook at the end of the month, and it gives you the option of transferring the money from whatever you want: mutual fund, money market, even an old-fashioned checking account. Your daughter can store the money any way she wants-on her laptop, on a debit card, even (in the not too distant future) on a chip implanted under her skin..." Implanted under the skin? Sounds like Revelation 13:16-18 to me.. the Mark of the beast!

With networking systems such as PLUS, CIRRUS, EXCHANGE, STAR, and NATIONNET, the U.S. is tied in one of the biggest Data bank systems in the world. VISA is the largest Automated Credit system in the world, with MASTERCARD running a close second. With the use of the S.W.I.F.T. organization, this banking network is truly worldwide.

Quoted from Business Week April 18, 1977, One of Citibank's officials commented on the one Super Card System saying, If there is just one card...it will be issued by the government!

Are we coming to a complete cashless society..? Sure seems that way, and if we do then the government will be able to keep complete control over the way we spend our money... Big Brother is here and getting BIGGER! What is the advantage of a cashless society? You can run an illegal drug business, cheat on your taxes, or over draw on your checking account.

Here, I would like to add something I found on the internet at www.worldnetdaily.com..

National ID card on fast track Transportation Department already making the rules By David M. Bresnahan Copyright 1998, WorldNetDaily.com Like it or not, the day is fast approaching when every American will carry a national identification card. Those who do not have one will be denied many basic services. Little notice was given to the issue in 1996 when Congress passed the Illegal Immigration Reform and Immigrant Responsibility Act. One section of the act requires all states to make their driver's licenses comply with certain guidelines found in Section 656 (b) of the act. Federal agencies will be required to prohibit the use of state driver's licenses beginning Oct. 1, 2000, unless they comply with the federal standards. The new licenses must use the Social Security number as the driver's license number, for example. The act also calls for digitized biometric information to be a part of each license, or "smart card." This information will not be required initially. But later, the biometric information will include fingerprints, retina scans, DNA prints, and other similar information. Responsibility for the design and implementation of the cards has been given to the National Highway Traffic Safety Administration of the Department of Transportation. That agency has recently published the proposed "Driver's License/SSN/National Identification Document," which contains the guidelines which must be in force by Oct. 1, 2000. The "Notice of Proposed Rule Making" sets out the standards for each state to follow in the design of "identification documents." "These new National ID regulations violate every notion of federalism, because they force states to comply with regulations issued by the federal government without any constitutional authority to do so," says Patrick Poole of the Free Congress Foundation. "Nor are federal agencies empowered to force state to gather detailed information on every person in order to comply with federal mandates. The net result of the DOT's regulations is to establish a national ID system, which has been opposed by almost every non-governmental sector for the past five decades." Shortly after the passage of the act by congress, Utah state Rep. Gerry A. Adair introduced a bill to comply with the federal requirements. The level of opposition from the public was extensive, which Adair said at the time surprised him. The bill was defeated and was regarded as one of the most controversial bills of that session. States which fail to comply with the federal requirements will impose difficulties on their citizens. Without the new card it may become impossible to purchase firearms, get a job, board a plane, vote, cash a check, open a bank or investment account, purchase insurance, receive federal benefits, obtain a student loan, receive Medicare or Medicaid benefits, and many more basic services presently taken for granted according to Poole. Once the card is in use, Poole suggests that privacy will be a thing of the past. Information will be easily available about all aspects of every American's life. The information stored in each card will be held in a computer chip imbedded in the card, which may one day be injected under a person's skin. Experiments testing such an identification system have already been conducted on military personnel and for identification security at the Olympics. For those who point to the Tenth Amendment to the Constitution, Poole explains that President Bill Clinton recently signed Executive Order 13083 entitled "Federalism." That document effectively gives authority to the federal government to force anything it wants on states. No effort was made by anyone in Congress to overturn the

Executive Order. Conservatives went to their legislators in 1995 to protest an effort by Utah Gov. Mike Leavitt to establish a Conference of the States to address the issue of states rights and federalism. Leavitt campaigned hard and pointed to a federal government that had overstepped its intended role and authority by imposing unfunded mandates on states. Conservatives succeeded in defeating the effort but have thus far remained relatively silent about the recent Executive Order 13083. Phyllis Schlafly, president of Eagle Forum surprisingly had no comment on the Executive Order. Leavitt could not be reached for comment, but he has been very outspoken on states rights in the past. The executive order apparently sets the stage for the federal government to dictate anything it wants to the states. Compliance will be mandated and states rights will be a thing of the past, according to Poole. He said he would not be surprised to see more mandates such as the national ID card forced upon unwilling states and citizens. There is still time for individuals to comment on the Notice of Proposed Rulemaking. All comments must be in writing and are limited to a maximum of 15 pages and must be received no later than Aug. 3, 1998. Two copies of your comments should be sent to Docket No. NHTSA-98-3945, Docket Management Room PL-401, National Highway Traffic Safety Administration, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590. Place the docket number on each page of your comments. Poole also suggests individuals contact their congressional representatives. "They passed this thing, and they can change it if they hear from enough people," he said.

I would like to discuss the switching guards in design #1. If you will notice, the switching guards are made up of 3 sets of 2 narrow lines. One set on the far left, one set on the far right, and one set in the middle that divides the manufacturers code from the product code. The scanner sees the first set of lines and the computer knows to switch on and start reading the manufacturers code, the middle set tells the computer to switch and start reading the product code. Then the last set tells the computer that it has reached the end of the code. The scanner/computer can read the code in any direction and by the difference from set #1 one to set #2, the computer can tell the difference between the manufacturers code and product code.

Design #1 has 3 sets of switching guards that also have the same 101 binary code as the number 6 from list #2. So the Switching guards are a set of 3 "6's" or 666.

See Revelation 13

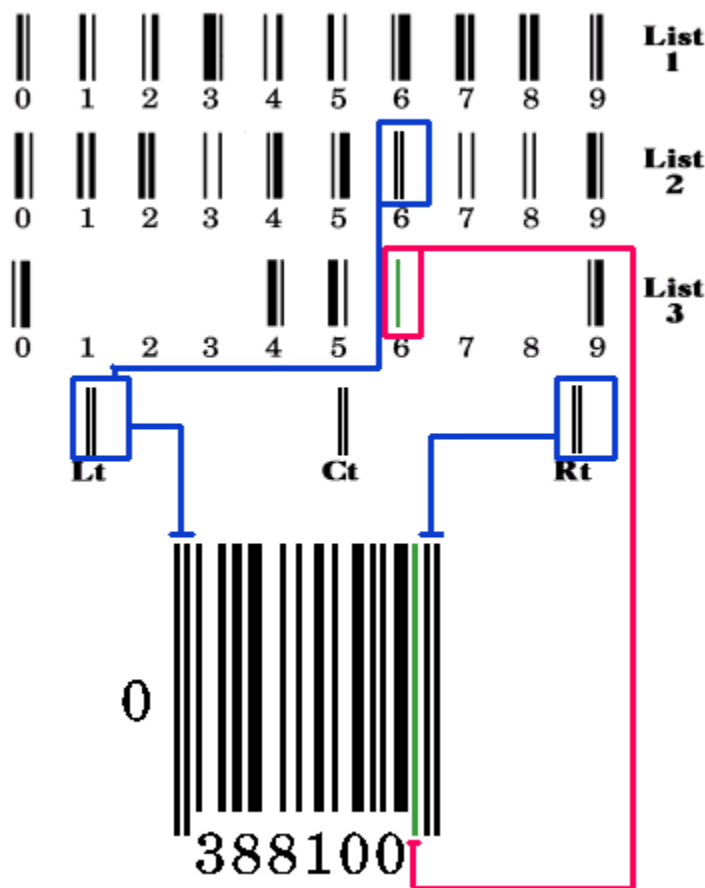

Now I would like to discuss the lines that make up the switching guards and also the number 6 from set #2 for the product codes. They all have the same 2 narrow lines and they all have the same 101 binary code configuration. That's interesting! A mark used for buying and selling which contains 6-6-6 in the form of switching guards.

Revelation 13:16-17 >> And he causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads And that no man might buy or sell, save he that had the mark, or the name of the beast, or the number of his name Here is wisdom. Let him that hath understanding count the number of the beast: for it is the number of a man; and his number [is] Six hundred threescore [and] six. (666)

Now let's examine design #2. First of all, design #2 is half the size of design #1. It will also use any of the codes from set #1 and from set #2 it will use the codes for the numbers 1-2-3-6-7-8, and any of the codes from set #3. Look at the 0-4-5-9 in set #2. If you will notice the 0 in set #2 becomes the 5 in set #3. The 4 in set #2 becomes the 9 in set #3. The 5 in set #2 becomes the 0 in set #3. And the 9 in set #2 becomes the 4 in set #3. Both manufacturers and product codes are included into this one design. But, does this design have the 6-6-6 coding included also?

If you will notice the left switching guard and the right switching guard, you will see that they are the same as is in design #1. Now look at the code for the 6 in set three and you will notice that it is the only code of all of them that has the single line. It has a binary code of 0-1-0 and is also nested next to the right switching guard which gives us a complete binary code of 0-1-0-1-0-1. This code is how the computer determines that the mark is design #2 and not one. Also, the computer can

know that the 0, 4, 5, and 9 are the codes from set #3. So as you can see, we still have a 6-6-6 coding in the switching guards of design #2.

Design #2 uses Lists #1, #2 & #3 to make up the code used for the product and manufactures code together, but the switching guards are different, The left and right come from the 6 of list #2 and the single line next to the right guard comes from the 6 of list #3.

In Sept. 20, 1973, Senior Scholastics magazine had an article titled: Public Needs and Private Rights - Who is Watching You?: It stated: All buying and selling in the program will be done by the computer. No currency, no change, no checks. In the program, people would receive a number that had been assigned them. Tattooed in their wrist or forehead.. The number is put on by laser beam and cannot be felt. The number in the body is not seen with the naked eye and is as permanent as your fingerprints. All items of consumer will be marked with a computer mark (UPC). The computer outlet in the store which picks up the number from the item at the check-stand will pick up the number in the persons body and automatically total the price and deduct the amount from the person's 'special drawing rights' account... The use of laser branding is already a reality. Dr. Keith Farall of Washington State University, has developed laser branding and a universal mark (unalterable) for the use of branding livestock and pets. It is quick and painless, says Dr. Farall, in a fraction of a second a technician can stitch a brand or initial into the skin. And it is theoretically possible to include man as another one of these animals. Says the doctor, who admits he has branded himself in the fashion by way of experiment.

A hand scanner that scans the geometric design of your hand.

In the Nov. 1985 Prophecy in the News, an article by J. R. Church entitled Mark of the beast tested in Sweden stated: Believe it or not, some 6000 people in Sweden have agreed to accept a mark on their right hand in order to test a new method of money exchange-in Australian Banks Employee Union.

In 1798, a Methodist minister, Adam Clarke wrote: The mark of the beast will be an 18 digit number, 6+6+6 18. (Adam Clarke Unabridged Bible Commentary). In 1977, Dr. Hanrick Eldeman, chief analyst for the European Common Market, announced that he was ready to begin assigning a number to every person in the world; and he plans to use a three-six-digital unit, 18 numbers.

In his article concerning the worlds largest computer, Feb. 1975, Mr. Charles Duncombe of CFM Information Networks, Jerusalem Bureau, states: Dr. Hanrick Eldeman, chief analyst of the Common Market Confederacy in Brussels, has revealed that the computerized restoration plan is already under way to straighten out world chaos. A crises meeting in early 1974 brought together 'Common Market' leaders, advisors and scientists, at which time Dr. Eldeman unveiled THE BEAST. It is a gigantic, three story, self programming computers with the potential of numbering every human being on earth.

If we take our 9 digit social security number, add 3 for the 3 digit area code, add 3 for the 3 digit national number (U.S. is 110), and add the 3 digit number 6-6-6, that gives us a total of 18 digits. Sure seems to fit together with what the Bible says in Revelation 13:16-18.

The European Economic Community (EEC), also called the European Common Market, is the economical association of Western European countries established by the Treaty of Rome in 1957 to facilitate:

1. The removal of barriers to trade among member nations
2. The establishment of a single commercial policy towards non-member countries.
3. The eventual coordination of transportation systems, agricultural policies, and general economical policies.
4. The removal of private and public measures restricting from competition.

5. The assurance of the mobility of labor, capital, and entrepreneurship.

The original members were, France, Belgium, Luxembourg, The Netherlands, Italy, and West Germany. In January, 1973, the United Kingdom, Denmark, and Ireland became members, and Greece joined in January 1981. (10 Nations). Brussels, capital of Belgium and of the Brabant province in the Valley of the Senne River, a tributary of nation's largest city. It forms a regional metropolis and an international economic and political center, housing the headquarters of many super national organization, including those of the European Economic Community (EEC), the North Atlantic Treaty Organization (NATO), and also the Society for Worldwide Interbank Financial Transactions (SWIFT). Brussels is the center of the buying and selling of the world. It may also be noted that S.W.I.F.T. and the EEC share the same beast computer in Brussels Belgium.

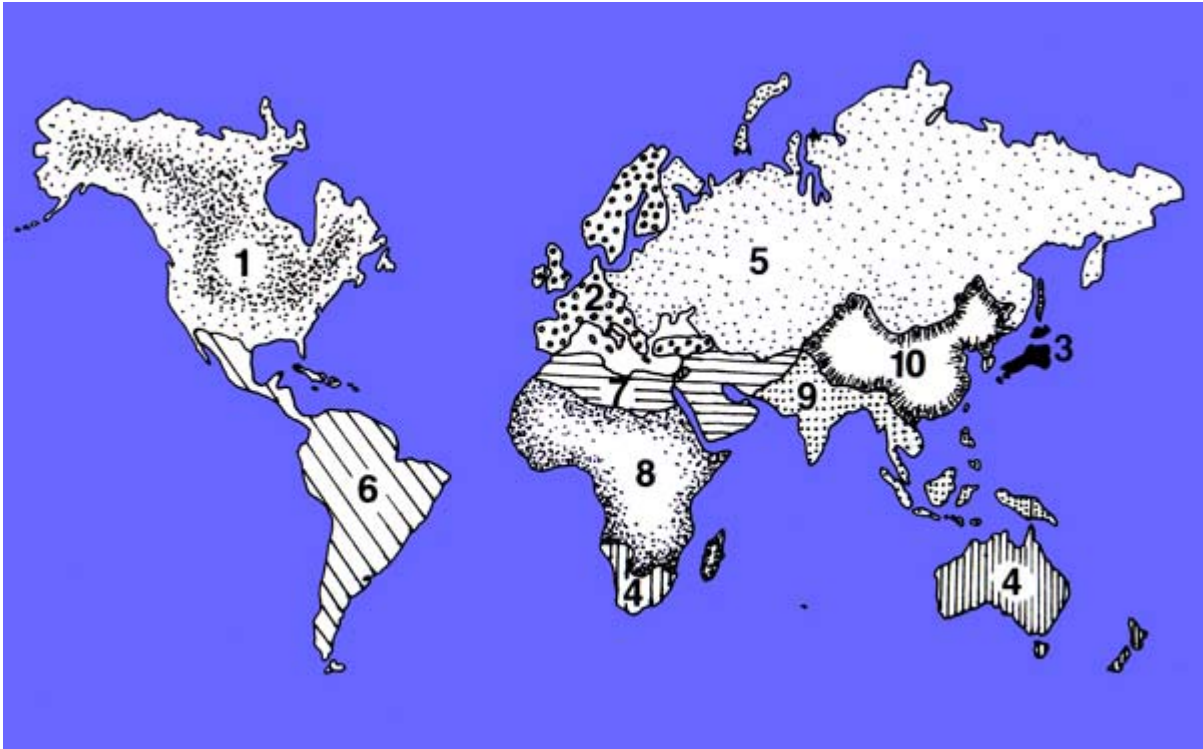

In the Sept. 18th 1989, issue of TIME Magazine, there is an article called Charging Ahead - Watch out, Washington and Moscow. Flush with money and increasingly unified, Western Europe is marching to its own drummer. This article speaks of the fast growing effort of the uniting of then European Community. There are presently 12 members now in the community. As quoted from this article; In a bold venture eyed warily by the rest of the globe, the 12 members of the European Community have pledged to unite their markets by Dec. 31, 1992, creating the worlds largest market and trading bloc. West Europeans have illusions about their ability to create a United States of Europe. Biblical prophecy says that the old Roman empire will rise again in the End times and we see this very thing happening with the European Community. These member nations are the same nations that were in the old Roman empire. Biblical prophecy also says that it will be a 10 nation confederacy. I believe there will be a merger and/or a drop out of a couple of nations. From the same article; Only last week the E.C. warned of 'worrying delays' by member countries in implementing single-market legislation.

Revelation 17:12 And the ten horns which thou sawest are ten kings, which have received no kingdom as yet; but receive power as kings one hour with the beast, These have one mind, and shall give their power and strength unto the beast, And the woman which thou sawest is that great city, which reigneth over the kings of the earth. -- Could these Nations of the Common Market be the Ten Kings? And could the great city be the center of the Common Market in Brussels. I'm not saying that they are but, it seems to fit together. They are from the old Roman empire. And is this the revised Roman Empire. In Jan 1, 1994, the European Community was established as National Status.

I would also at this point like to introduce another possibility for the meaning of the "Ten Horns". In 1968 an organization was started know as "[The Club of Rome](#)." Its founders were Italian scholar and industrialist Aurelio Peccei and Scottish scientist Alexander King. The club started in Rome, hence the name. The club of Rome was founded with 10 members from different countries, like: Dr Jim Botkin, Jay Forrester, Dennis meadows, Donella H Meadows, Jørgen Randers and William W. Behrens III. This organization published their first book "the limits to growth" in 1972. The association has now 100s members all around the world and they conduct annual meetings to regroup their ideas. For the uninformed, the Club of Rome is an offshoot of The [Bildebergers](#), through one Aurelio Peccei (now deceased), a prominent Italian industrialist with close ties to the Fiat and Olivetti corporations. Like The [Bildebergers](#), the COR draws a high percentage of its members from the [Council on Foreign Relations](#) (CFR). The COR has been assigned the task of overseeing the regionalization and unification of the entire world, wherein ALL nations of the world will give up their sovereignty in favor of a global government! Similar idea can also be found in the [Trilateral Commission](#).

One idea proposed by [The Club of Rome](#) is the reduction of the population. ([Click Here](#))([And Click Here](#)). In a Report release (Sept 17, 1972) to show progress in the STRATEGY FOR SURVIVAL PROJECT, the Club of Rome proposed it's idea of dividing the world into ten regions (Kingdoms).

These regions would then be under their own government that would then be under a central government.

REGION 1
Canada
United States

REGION 2
Western Europe
British Isles
Norway, Sweden and Finland
Turkey

REGION 3
Japan
Pacific Islands

REGION 4
Australia
New Zealand
South Africa

REGION 5
Eastern Europe
Russia
Siberia
Mongolia
Korea

REGION 6
Central America (including Mexico)
South America
Caribbean Islands

REGION 7
Egypt
Lybia
Tunisia
Algeria
Morrocco
Saudi Penisula
Jordani
Syria
Iraq
Iran
Afghanistan
Pakistan

REGION 8
Africa (without the above North African countries and South Africa)
Madagascar

REGION 9
India

S. E. Asia

REGION 10 China

Note: This list is over 30 years old. Alignment may vary in final format. The primary issue is: a one-world government has been officially planned and shall be fully implemented in the near future.

In the Jan 23, 1995 Wall Street Journal in an article titled Panel Advises Private Sector to Prepare For Shift to One European Currency. In this article it stated that Next summer, the group's

final report will be presented to the 15 European Union governments with a primer on how to perform the conversion... French government officials speak of pressing for the launch of a European monetary union in 1997, the earliest start-up date provided by the Maastricht treaty. It may not be completely implemented in 1997 but as we can see the wheels are in motion. Of course, once a common currency is established, why not switch to cashless.?

Daniel 2:42 And [as] the toes of the feet [were] part of iron, and part of clay, [so] the kingdom shall be partly strong, and partly broken. If you were to check out the political sides of these nations in the Common Market, you would find out that some of the nations are weaker nations politically and some are stronger. But, unite these nations together and you have a United European nation that is in the running strength as is the U.S. and the once U.S.S.R. Now that the U.S.S.R. is no longer then I'd say we have some pretty head to head competition.

Daniel 2:44 And in the days of these kings shall the God of heaven set up a kingdom, which shall never be destroyed: and the kingdom shall not be left to other people, [but] it shall break in pieces and consume all these kingdoms, and it shall stand for ever. According to this scripture, Jesus is supposed to return during this 10 nation confederacy and rule forever. I (in my opinion) feel that within our lifetimes that we will see the return of Jesus and the end of the world as we know it to be today.

Daniel 12:4 But thou, O Daniel, shut up the words, and seal the book, [even] to the time of the end: many shall run to and fro, and knowledge shall be increased. -- According to this scripture, Daniel was told that no one would understand the end time prophecies until the end. and that knowledge and travel would be greatly increased. Today we see that very thing happening, with the computer age in play, our knowledge is increasing at a geometric scale of approximately double every 5 years, and with the Jet age and Space age we travel at great distances all the time. Even traveling at a distance of just 30 miles (which most of us do everyday) was not even done at the turn of the century. And now with the use of such services as America-On-Line, Compu-serve and the Inter-Net, information and knowledge is being share across the world at the speed of light on the information highway where there are no speed limits.

Matthew 24:3-7 And as he sat upon the mount of Olives, the disciples came unto him privately, saying, Tell us, when shall these things be? and what [shall be] the sign of thy coming, and of the end of the world. And Jesus answered and said unto them, Take heed that no man deceive you. For many shall come in my name, saying, I am Christ; and shall deceive many. And ye shall hear of wars and rumors of wars: see that ye be not troubled: for all [these things] must come to pass, but the end is not yet. For nation shall rise against nation, and kingdom against kingdom: and there shall be famines, and pestilences, and earthquakes, in divers places. -- Just this very thing is happening today, increased false religions; 45% of the world is in some type of war; Starvation and disease (AIDS, CANCER, Etc.); Earthquakes have also increased over 300% in the last 50 years all over the world. Just in 1995 we have had some pretty major earthquakes already. Japan's killing over 5000 and billions of dollars of destruction.

According to the Bible (which I believe is the true Word of God) We can be saved by the grace of God and don't have to work for salvation. (Eph. 2:8-9). God provided a perfect sacrifice for our sins through the death of Jesus on the cross. -- John 3:16-18 For God so loved the world, that he gave his only begotten Son, that whosoever believeth in him should not perish, but have everlasting life. For God sent not his Son into the world to condemn the world; but that the world through him might be saved. He that believeth on him is not condemned: but he that believeth not is condemned already, because he hath not believed in the name of the only begotten Son of God.

Satan, the Devil, tries to lie to us in many ways and to keep us from God. God said that if we honestly seek Him that we will find him and through Jesus we may find truth and an abundant life. -- John 10:10 The thief cometh not, but for to steal, and to kill, and to destroy: I am come that they might have life, and that they might have [it] more abundantly.

Non of us are innocent, we have all sinned in some form or fashion and God knows it, even if we try to deny it, and God is a just God and sin brings about death, but through the shed blood of Jesus the debt to sin is paid, all we need to do is humbly go to God and confess our sins and receive the free gift of eternal life through Jesus. -- Romans 6:23 For the wages of sin [is] death; but the gift of God [is] eternal life through Jesus Christ our Lord.

I Corinthians 15:3-6 For I delivered unto you first of all that which I also received, how that Christ died for our sins according to the scriptures, And that he was buried, and that he rose again the third day according to the scriptures, And that he was seen of Cephas, then of the twelve, After that, he was seen of above five hundred brethren at once; of whom the greater part remain unto this present, but some are fallen asleep. -- So all we have to do is to believe in our hearts and minds that Jesus is the Messiah, and that he came to this earth to die for use and we can be saved. Jesus is God manifest in the flesh according to the Bible.

John 14:6 Jesus saith unto him, I am the way, the truth, and the life: no man cometh unto the Father, but by me. -- Jesus is the only way to be saved and there is no other way, and hes the only way we become sons of God. -- John 1:12 But as many as received him, to them gave he power to become the sons of God, [even] to them that believe on his name.

Revelation 3:20 Behold, I stand at the door, and knock: if any man hear my voice, and open the door, I will come in to him, and will sup with him, and he with me. -- Jesus is knocking at the door of your heart, all you have to do is open that door freely and ask him for the forgiveness he freely gives and to come into your heart and be the Lord of your life, then you will have eternal life. -- I John 5:11 And this is the record, that God hath given to us eternal life, and this life is in his Son.

I John 5:12 He that hath the Son hath life; [and] he that hath not the Son of God hath not life. The word 'God' used in the Genesis creative account comes from the Hebrew word 'Elohim', which is a plurality for God. This plurality could suggest that there is plenitude or fullness of power, knowledge, wisdom, majesty, and eternal being or existence. Also used for paganism, in this text it is used for the one true God of all things. Also suggested here for the plurality is the allowance for the New testament triunity for the Godhead (Father, Son, Holy Spirit) which may help in the explanation of verse 26 Let us create man in our image, after our likeness 'Us' and 'Our' plurals of majesty, image, and (or) likeness. Genesis 11:7 Go to, let us go down..... here again is suggested more than one in the one God to preform a particular task.

John 1:1 In the Beginning was the Word, and the Word was with God and the Word is God. In the beginning here also suggests a period of existence before time and that time was brought into existence at the creation. 'Word' comes from the Greek 'Logos' which means word, thought concept, and the expressions thereof. In the O.T. the concept conveyed activity and revelation, the word or wisdom of God is often personified. To the Greek mind it expressed the idea of reason and creative control. Revelation is the keynote idea to the 'Logos' concept. Here it is applied to

Jesus, who is all that God is and the expression of him. The Logos was already present in the Beginning and this is related to the Genesis 1:1 account. John 1:3 All things were made by him; and without him was not anything made that was made. Here it is suggested that the 'Logos' (Word) created all things and therefore was before all things. Since God's words and thoughts have been with God from all eternity then the Logos must have existed from all eternity because God can't create a part of himself. And since the entire work of creation was carried out by the Logos the Logos could not have created himself. To think that God created the Logos would suggest that God had no thoughts before the creation of the Logos. If God had no thoughts before the Logos then that would suggest that God did not exist before the Logos and therefore could not be eternal. Since God cannot exist without the Logos then the Logos must be as much God as God Himself and therefore is God. Since God is eternal, the first cause behind all things, and creator of all things, then the Logos which is every part as much as God must therefore be eternal.

1 John 1:1-2 That which was from the beginning, which we have heard, which we have seen with our eyes, which we have looked upon, and our hands have handled, of the Word of Life; (2) (For the Life was manifested, and we have seen it, and bear witness, and shew unto you the eternal life, which was with the Father, and was manifested unto us;) . This 'Logos' is also the Word of Life or Logos of Life which suggests that he brings forth life and is life. Since God is Life and has always existed and the Logos is the 'Word of Life' which brings for the Life the he therefore must also have always existed. John 1:4 In him was Life...

John 1:14 And the Word (Logos) was made flesh and dwelt among us, (and we beheld his Glory, the Glory of the only begotten of the Father,) full of Grace and Truth.

John 1:17 For the law came by Moses, but Grace and Truth came by Jesus Christ . The Logos (Word) which became flesh full of Grace and Truth is the one who brought grace and truth in the flesh, Jesus Christ. Since Jesus is the 'Logos', 'Word', from the Beginning, the creator of all things and the Logos is eternal with God and is God then therefore Jesus must be Eternal and God.

Micah 5:2 But thou, Bethlehem Ephratha, though thou be little among the thousands of Judah, yet out of thee shall he come forth unto me that is to be ruler in Israel; whose goings forth have been from of old, from everlasting. this 'He' is the eternal Angel-Jehovah coequal with Jehovah throughout the Old Testament, and Jesus fulfilled this verse when he was born in Bethlehem. From everlasting suggests that there was no beginning for Jesus.

1 Tim 3:16 And without controversy great is the mystery of godliness: God was manifest in the flesh, justified in the Spirit, seen of angels, preached unto the gentiles, believed on in the world, received up into Glory. God was manifest in the flesh, the Logos (word) was manifest in the flesh. The Logos and God are one in the same. Colossians 2:9 For in him dwelleth all the fulness of the Godhead Bodily. This verse suggests that deity itself has been manifest in body or material reality. Websters dictionary says that 'dwell' means stay, remain, abide as a permanent resident; reside. So in the Body of Jesus Christ the Godhead made permanent residence.

Acts 4:12 Neither is there salvation in any other: for there is none other name under heaven given among men , whereby we must be saved. Isaiah 43:3 says that God is our saviour, how can Jesus be our saviour and God be our saviour unless Jesus is God.

John 14:6 Jesus saith unto him, I am the way, the truth, and the life: no man cometh unto the Father, but by me. Jesus says that he is the only way of salvation so if God is our Saviour then Jesus must be God. Also, man cannot make it unless through Jesus and no other way or through no other person.

Hebrews 1:8 But unto the Son [he saith], Thy throne, O God, [is] for ever and ever: a scepter of righteousness [is] the scepter of thy kingdom. in this verse we see God the Father speaking to Jesus 'the Son' calling him God. The word 'God' used here in this text come from the Greek word 'Theos' which means deity. Also the Greeks use of the same word 'Theos' for the use of 'God' the Father giving to Jesus the same 'Attributes', of God, as the Father has which the Father is eternal so then must be the Son. The Greek recognized the Deity and Eternal state of Jesus from everlasting to everlasting. In the N.T. the word 'Theos' was appropriated by the Jews and retained by Christians to denote the one true God.

In the Septuagint (Greek O.T.) 'Theos' Translates (with few exceptions) the Hebrew word 'Elohim and Jehovah, the former indicating His Power and Pre-eminence, the latter His unoriginated, immutable, eternal and self-sustained existence.

Psalms 45:6 Thy throne, O God, [is] for ever and ever: the scepter of thy kingdom [is] a right scepter.

In the N.T., these and all the other Divine characteristics are predicated of Him. To Him are ascribed , e.g., His unity, or monism, e.g., Mark 12:29 And Jesus answered him, The first of all the commandments [is], Hear, O Israel; The Lord our God is one Lord ; 1 Tim. 2:5 For [there is] one God, and one mediator between God and men, the man Christ Jesus ; self- existence, John 5:26 For as the Father hath life in himself; so hath he given to the Son to have life in himself ; immutability, James 1:17 Every good gift and every perfect gift is from above, and cometh down from the Father of lights, with whom is no variableness, neither shadow of turning ; eternity, Rom. 1:20 For the invisible things of him from the creation of the world are clearly seen, being understood by the things that are made,[even] his eternal power and Godhead; so that they are without excuse ; universality. Matt. 10:29 Are not two sparrows sold for a farthing? and one of them shall not fall on the ground without your Father. ; Acts 17:[26] And hath made of one blood all nations of men for to dwell on all the face of the earth, and hath determined the times before appointed, and the bounds of their habitation. [27] That they should seek the Lord, if happily they might feel after him, and find him, though he be not far from every one of us. [28] For in him we live, and move, and have our being; as certain also of your own poets have said, For we are also his offspring. ; almighty power, Matt 19:26 But Jesus beheld [them], and said unto them, With men this is impossible; but with God all things are possible. ; infinite knowledge, Acts 2:23 Him, being delivered by the determinate counsel and foreknowledge of God, ye have taken, and by wicked hands have crucified and slain. ; creative power, Rom. 11:13 For I speak to you Gentiles, inasmuch as I am the apostle of the Gentiles, I magnify mine office ; Eph. 3:9 And to make all [men] see what [is] the fellowship of the mystery, which from the beginning of the world hath been hid in God, who created all things by Jesus Christ. ; absolute holiness, 1 Peter 1:15 But as he which hath called you is holy, so be ye holy in all manner of conversation. ; righteousness, John 17:25 O righteous Father, the world hath not known thee: but I have known thee, and these have known that thou hast sent me. ;faithfulness, 1 Cor. 1:9 God [is] faithful, by whom ye were called unto the fellowship of his Son Jesus Christ our Lord. ;love, 1 John 4:[8] He that loveth not knoweth not God; for God is love. [16] And we have known and believed the love that God hath to us. God is love; and he that dwelleth in love dwelleth in God, and God in him. ; mercy, Rom. 9:[15] For he saith to Moses, I will have mercy on whom I will have mercy, and I will have compassion on whom I will have compassion. [18] Therefore hath he mercy on whom he will [have mercy], and whom he will he hardeneth ; truthfulness, Titus 1:2 In hope of eternal life, which God, that cannot lie, promised before the world began.

These same Divine attributes are likewise indicated or definitely predicated of Christ, e.g., Matt. 20:[18] Behold, we go up to Jerusalem; and the Son of man shall be betrayed unto the chief priests and unto the scribes, and they shall condemn him to death. [19] And shall deliver him to the Gentiles to mock, and to scourge, and to crucify [him]: and the third day he shall rise again. ; John 1:[1] In the beginning was the Word, and the Word was with God, and the Word was God. [2] The same was in the beginning with God [3] All things were made by him; and without him was

not any thing made that was made. , John 1:18 No man hath seen God at any time; the only begotten Son, which is in the bosom of the Father, he hath declared [him] ; John 5:22 For the Father judgeth no man, but hath committed all judgment unto the Son ; John 5:23 That all [men] should honour the Son, even as they honour the Father. He that honoureth not the Son honoureth not the Father which hath sent him. ; John 5:24 Verily, verily, I say unto you, He that heareth my word, and believeth on him that sent me, hath everlasting life, and shall not come into condemnation; but is passed from death unto life ; John 5:25 Verily, verily, I say unto you, The hour is coming, and now is, when the dead shall hear the voice of the Son of God: and they that hear shall live ; John 5:26 For as the Father hath life in himself; so hath he given to the Son to have life in himself. ; John 5:27 And hath given him authority to execute judgment also, because he is the Son of man ; John 5:28 Marvel not at this: for the hour is coming, in the which all that are in the graves shall hear his voice. ; John 5:29 And shall come forth; they that have done good, unto the resurrection of life; and they that have done evil, unto the resurrection of damnation.; John 8:58 Jesus said unto them, Verily, verily, I say unto you, Before Abraham was, I am. ; John 14:6 Jesus saith unto him, I am the way, the truth, and the life: no man cometh unto the Father, but by me. ; John 17:[22] And the glory which thou gavest me I have given them; that they may be one, even as we are one. [23] I in them, and thou in me, that they may be made perfect in one; and that the world may know that thou hast sent me, and hast loved them, as thou hast loved me. [24] Father, I will that they also, whom thou hast given me, be with me where I am; that they may behold my glory, which thou hast given me: for thou lovedst me before the foundation of the world.; Romans 1:4 And declared [to be] the Son of God with power, according to the spirit of holiness, by the resurrection from the dead., Romans 9:5 Whose [are] the fathers, and of whom as concerning the flesh Christ [came], who is over all, God blessed for ever. Amen., Philippians 3:21 Who shall change our vile body, that it may be fashioned like unto his glorious body, according to the working whereby he is able even to subdue all things unto himself. ; Colossians 1:15 Who is the image of the invisible God, the firstborn of every creature., Colossians 2:3 In whom are hid all the treasures of wisdom and knowledge.; Titus 2:3 The aged women likewise, that [they be] in behavior as becometh holiness, not false accusers, not given to much wine, teachers of good things. Hebrews 1:3 Who being the brightness of [his]glory, and the express image of his person, and upholding all things by the word of his power, when he had by himself purged our sins, sat down on the right hand of the Majesty on high., Hebrews 13:8 Jesus Christ the same yesterday, and to day, and for ever.; I John 5:20 And we know that the Son of God is come, and hath given us an understanding, that we may know him that is true, and we are in him that is true, [even] in his Son Jesus Christ. This is the true God, and eternal life.; Revelation 22:[12] And, behold, I come quickly; and my reward [is] with me, to give every man according as his work shall be. [13] I am Alpha and Omega, the beginning and the end, the first and the last.

Also these same attributes are mentioned in conjunction with the Holy Spirit, e.g., Matthew 28:19 Go ye therefore, and teach all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost. ; Luke 1:35 And the angel answered and said unto her, The Holy Ghost shall come upon thee, and the power of the Highest shall overshadow thee: therefore also that holy thing which shall be born of thee shall be called the Son of God.; John 14:16 And I will pray the Father, and he shall give you another Comforter, that he may abide with you for ever.; John 15:26 But when the Comforter is come, whom I will send unto you from the Father, [even] the Spirit of truth, which proceedeth from the Father, he shall testify of me.; John 16:[7] Nevertheless I tell you the truth; It is expedient for you that I go away: for if I go not away, the Comforter will not come unto you; but if I depart, I will send him unto you [8] And when he is come, he will reprove the world of sin, and of righteousness, and of judgment [9] Of sin, because they believe not on me [10] Of righteousness, because I go to my Father, and ye see me no more [11] Of judgment, because the prince of this world is judged [12] I have yet many things to say unto you, but ye cannot bear them now [13] Howbeit when he, the Spirit of truth, is come, he will guide you into all truth: for he shall not speak of himself; but whatsoever he shall hear, [that] shall he speak: and he will shew you things to come [14] He shall glorify me: for he shall receive of mine, and shall shew [it] unto you. ; Romans 8:9 But ye are not in the flesh, but in the Spirit, if so be that the Spirit of God dwell in you. Now if any man have not the Spirit of Christ, he is none of his. ; Romans 8:26 Likewise the Spirit also helpeth our infirmities: for we know not what we should pray for as we

ought: but the Spirit itself maketh intercession for us with groanings which cannot be uttered.; I Corinthians 12:11 But all these worketh that one and the selfsame Spirit, dividing to every man severally as he will.; II Corinthians 13:14 The grace of the Lord Jesus Christ, and the love of God, and the communion of the Holy Ghost, [be] withyou all. Amen.

Isaiah 7:14 Therefore the Lord himself shall give you a sign; Behold, a virgin shall conceive, and bear a son, and shall call his name Immanuel.

Isaiah 9:6 For unto us a child is born, unto us a son is given: and the government shall be upon his shoulder: and his name shall be called Wonderful, Counselor, The mighty God, The everlasting Father, The Prince of Peace.

Isaiah 45:21 Tell ye, and bring [them] near; yea, let them take counsel together: who hath declared this from ancient time? [who] hath told it from that time? [have] not I the LORD? and [there is] no God else beside me; a just God and a Saviour; [there is] none beside Me.

Isaiah 45:22 Look unto me, and be ye saved, all the ends of the earth: for I [am] God, and [there is] none else.

Matthew 1:23 Behold, a virgin shall be with child, and shall bring forth a son, and they shall call his name Emmanuel, which being interpreted is, God with us. John 10:30 I and [my] Father are one.

John 10:33 The Jews answered him, saying, For a good work we stone thee not; but for blasphemy; and because that thou, being a man, makest thyself God. John 20:28 And Thomas answered and said unto him, My Lord and my God.

Romans 9:5 Whose [are] the fathers, and of whom as concerning the flesh Christ [came], who is over all, God blessed for ever. Amen.

I Timothy 3:16 And without controversy great is the mystery of godliness: God was manifest in the flesh, justified in the Spirit, seen of angels, preached unto the Gentiles, believed on in the world, received up into glory.

Titus 2:13 Looking for that blessed hope, and the glorious appearing of the great God and our Saviour Jesus Christ.

II Peter 1:11 For so an entrance shall be ministered unto you abundantly into the everlasting kingdom of our Lord and Saviour Jesus Christ.

I John 5:20 And we know that the Son of God is come, and hath given us an understanding, that we may know him that is true, and we are in him that is true, [even] in his Son Jesus Christ. This is the true God, and eternal life.
